SUMMARY

MCA candidate and BCA graduate with 2 internships, 3 deployed MERN stack projects, and 2 published research papers. Skilled in React.js, Node.js, Express.js, MongoDB, REST APIs, JWT authentication, and RBAC. Ready to contribute to real-world products from day one.

TECHNICAL SKILLS

Frontend: React.js, Next.js, HTML5, CSS3, JavaScript (ES6+), TypeScript (basic), Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST API Design, JWT Authentication, RBAC, NestJS (basic)

Databases: MongoDB, Mongoose ODM, MySQL, SQL, PostgreSQL (basic)

Tools: Git, GitHub, VS Code, Vercel, Render, Postman, npm

Other: Android (Kotlin, Jetpack Compose), Python, Arduino, Embedded C, Agile / Scrum

PROJECTS

Uber-Like Ride Booking Platform | *React.js · Node.js · Express.js · MongoDB · JWT*

- Built a full-stack ride booking app with JWT authentication, RBAC for rider/driver roles, and 12+ REST API endpoints for ride requests, trip management, and fare calculation.
- Architected MongoDB schema with optimized queries, reducing average data retrieval time by 30%.
- Tested all API endpoints through Postman and implemented environment-based config management for secure production deployment.

Event Feedback & Analytics System | *React.js · Node.js · Express.js · MongoDB · RBAC*

- Developed a 3-role platform (Admin, Organizer, User) with JWT auth, RBAC, and 10+ secure REST APIs for feedback submission, user management, and CSV data export.
- Built an interactive analytics dashboard displaying feedback trends, ratings distribution, and response rates — eliminating all manual reporting.
- Implemented input validation and unit tests for critical API routes to prevent injection attacks and ensure data integrity.

GitHub: <https://github.com/Aryan102004/feedback-.git> | Live: <https://event-feedback-system-sd57.onrender.com>

IoT Obstacle Detection System | *Arduino · Embedded C · Ultrasonic Sensors*

- Designed a real-time obstacle detection system with sub-10ms response time using HC-SR04 sensors and optimized Embedded C code.
- Reduced false-positive detections by ~30% through sensor data processing algorithm improvements — deployed as a working safety automation prototype.

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | Sysslan IT Solution

Feb 2026 – Mar 2026

- Built and deployed 3 full-stack features using React.js and Node.js/Express.js, improving page load performance by 20% and resolving 15+ bugs.
- Designed 8+ RESTful API endpoints for JWT auth, CRUD operations, and analytics — tested via Postman — within a 4-member Agile team.
- Collaborated in sprint planning, daily stand-ups, and peer code reviews, contributing to on-time feature delivery across 2 release cycles.

Prompt Engineering Intern | Atharva Optikos Syndsseis Pvt. Ltd.

Jun 2024 – Aug 2024

- Engineered 30+ structured prompts for LLM pipelines, improving model output accuracy by ~25% for internal software development workflows.
- Conducted A/B testing of prompt strategies and delivered structured research reports to engineering and product leads.
- Collaborated cross-functionally with developers to align AI prompt design with real-world software requirements.

EDUCATION

Master of Computer Applications (MCA) — In Progress Amity University, Raipur	<i>2025 – Present</i>
Bachelor of Computer Applications (BCA) Amity University, Raipur	<i>2022 – 2025</i>
Higher Secondary — Commerce Gurukul English Medium Higher Secondary School	<i>2022</i>

RELEVANT CERTIFICATIONS

- Mastering Android App Development with Kotlin
- The Complete Python Bootcamp
- Security Operations Center (SOC)
- Foundations of Software Testing and Validation
